SUMMARY

Full Stack Web Developer leveraging graphic arts & technical background to build beautifully designed websites. Recently earned a certificate in full stack web development from the University of Toronto, with newly developed skills in Javascript, CSS, Node.js, React.js and MySQL. Also earned a BTech in Graphic Communications Management in 2014. Motivated to find ways to make things BETTER - more efficient, responsive, engaging, and beautiful. I am highly organized and eager to learn, given my 6 years in project management roles in both agency and corporate settings. In addition, I have 10 years experience as a freelance web and print designer. I'm eager to leverage my experience and new skills as a part of a team or project to build amazing websites and applications.

TECHNICAL SKILLS

Languages: APIs, Bootstrap, Express.JS, HTML/CSS, Javascript, JSON, MongoDB, MySQL, NoSQL, Python, React, Sequelize.js

Applications: Adobe AI/PS/ID/Acrobat, Basecamp, BLUE, Esko, Filemaker Pro, Google Apps, Heroku, Office365, Repl.it, VS Code,

Jar Creative

Toronto,

ON

Managing multiple concurrent web and print projects including the creation and execution of project work plans and revising as appropriate to meet changing needs and requirements.

PROJECTS

Get Growing | Github: <https://github.com/ryanbrowne360/GardenAppProject> | Deployed: <https://murmuring-dawn-18632.herokuapp.com/>

- Get Growing is an online platform that can be used to track your garden. It allows you, the mighty home gardener, to create a new post for every plant in your garden, make field notes and track your progress.
- My core responsibilities included project management, design & front-end development
- Tools/Languages: HTML5, CSS, React, React-Bootstrap, Bootstrap, Adobe Fonts, Font Awesome, Mongoose, Node.js, Express, Heroku & Github Projects

Flame Game | Github: <https://github.com/SSamoridny/Project-2-Flame-Game> | Deployed: <https://tranquil-temple-78360.herokuapp.com/>

- Flame Game (an Apothecary of Hilarity), is an ecommerce website that includes a product page, cart and checkout.
- My core responsibilities included design & front-end development
- Tools/Languages: HTML5, CSS, Javascript Bootstrap, Adobe Fonts, Express, Heroku & MySQL

What's for Dinner? | Github: <https://github.com/ryanbrowne360/Project1> | Deployed: <https://ryanbrowne360.github.io/Project1/>

- What's for Dinner? is a web application that helps answer one of life's most important questions. It is a recipe and restaurant finder that uses two different APIs.
- My core responsibilities included design & front-end development
- Tools/Languages: HTML5, CSS, Bootstrap & APIs (Edamam and Yelp)
